

THE WALL BUILDERS

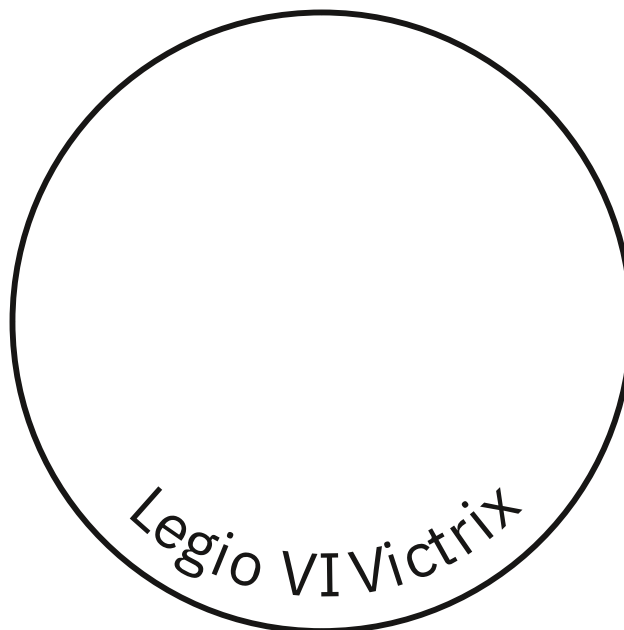

The Antonine Wall was built by soldiers from the Second Legion (Legio II Augusta), the Sixth Legion (Legio VI Victrix), and the Twentieth Legion (Legio XX Valeria Victrix).

Each legion had their own symbols. These are the symbols of the Second and Twentieth Legions:

There has been no symbol found on the Antonine Wall for the Sixth Legion.

1. In the empty circle below, can you design a symbol for the Sixth Legion?

2. The wall was built in sections. When the legion finished their section, they made a stone slab to celebrate. Look at this slab. **Can you work out which legion built this section? Look for the symbol and for the legion number.**

3. Design your own distance slab below to celebrate completing a section of the wall.
